

## REMARKS

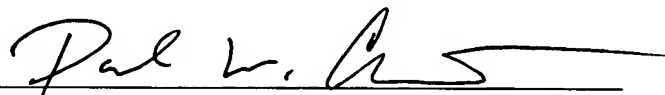

The foregoing amendments to allowed claims 26, 42 and 43 merely correct minor matters of form. The amendment to claim 26 returns that claim to its prior form before the Examiner's amendment in the Notice of Allowability. In claim 26, at least one nozzle of the first supply system and at least one nozzle of the second supply system are being referenced. Therefore, the claim properly reads "... the at least one nozzles of first and second supply systems ..." is accurate. Correspondingly, "is positionable" has been amended to recited "are positionable." The amendments to claims 42 and 43 merely address minor inadvertent typographical errors, where "was" has been replaced with "wall" in both instances.

These minor amendments do not warrant reopening prosecution on the merits and do not add any new matter. Therefore, Applicants respectfully request entry of these minor amendments.

Respectfully Submitted,

**McDonnell Boehnen Hulbert & Berghoff LLP**
